

**Revisit. Refresh. Prepare.**  
**Refresh your plan and supplies**

NOAA predicts an active hurricane season with 9-15 named storms and 4-8 hurricanes.

Harrison County Emergency Management encourages you to refresh your existing hurricane plan.

How are you going to implement the changes you've made after revisiting your plan?

It's also a great time to refresh your supplies. Bottled water, batteries – these things have shelf lives and may be expired.

Do you have enough supplies for you and your family to survive seven days?

Take the time to talk to your doctor about what you will need to do about important medication in the case of a major weather event.

**How's your insurance policy? Make certain your policy is up to date and make any changes you wish to the policy.**

**Do you have backup chargers for your phone?**

**Refresh your plan and supplies while there's time.**
